Message

The Livestock Sector contribute immense support to the overall development of Agriculture Sector in the country. Over the period, the contribution of livestock sector in the Agriculture Sector has been showing steady improvement that attributes to its importance in the Indian economy. It is worth to be mentioned the role of State Governments in achieving the progress towards this sector. I am happy to share that Department of Animal Husbandry, Dairying & Fisheries take painstaking efforts in compiling and publishing this report "Basic Animal Husbandry and Fisheries Statistics 2018". This publication records the current production estimates and many more statistics that are useful for all policy makers, researchers and other stakeholders across the globe. The information compiled here would not have been possible without the active participation of all States/UTs.

I congratulate the team of D/o of Animal Husbandry, Dairying & Fisheries for bringing out this annual publication on a regular basis. I extend my sincere thanks to **Shri Tarun Shridhar, Secretary (ADF)** under whose abled leadership the publication has been brought out.

MESSAGE

Livestock Sector is an integral part of rural economy plays an important role in the national economy and socio-economic development of the country. It also supplements farmer's income and generating gainful employment. The Statistics tools are the important fact finding machines by which the growth of the sector is presented in a systematic manner. Statistics itself marks great importance for framing policies and programmes of all sectors including Animal Husbandry. The Collection of Animal Husbandry Statistics is governed by a systematic approach and has been undertaking since past in participation with all States/UTs through continuous support and monitoring by the Department of Animal Husbandry, Dairying & Fisheries. I am pleased to share this compendium with all the stakeholders as it gives a review of Animal Husbandry sector briefly in terms of statistics. I have learnt that this publication is a compilation of the all relevant statistics of livestock sector that contain up-to- date information on livestock production, livestock population and other information on livestock diseases, infrastructure, fisheries statistics etc.

I appreciate the tireless efforts of officers and staff of Department of Animal Husbandry, Dairying & Fisheries in bringing out this 19th series of the edition of the annual publication.

MESSAGE

The livestock production plays a major role in the life of farmers. It provides food, income, employment and many other contributions to rural development. Animal products such as milk, eggs, meat provide daily cash income and much required nutrition. Considering the vast livestock resources of India, our country stands in the top line in the world in all production statistics of livestock especially for milk and egg production. This publication contains useful information, such as, estimates of major livestock products like milk, eggs, meat and wool, export and import of livestock products, gross value added to livestock, sectors and fisheries statistics.

I acknowledge the Protocol Officers' of Animal Husbandry, Dairying & Fisheries for their efforts in bringing such publication.

MESSAGE

Animal Husbandry sector gives enormous self-employment opportunities, which in turn contributes to the development of the country. The contribution of this sector to the National GVA has a visible progress and highlights the present as well as futuristic importance of this sector under the umbrella of Agriculture sector. The data compilation and data management is one of the key activities that helps all policy-planners to evolve farmer centric beneficiary oriented programmes and initiatives. I believe that this publication will give an insight to all stakeholders for better understanding of the livestock sector. The report covers all basic statistics that has national as well as international importance. I extend my sincere gratitude to all officers and staff members who have taken their pain to bring out such publication on regular basis.

FOREWORD

Livestock is an integral component of farming system in India. Its contribution to the Indian Agriculture and Indian Economy is in a progressive stage with its contribution of more than 25% of total agricultural GDP. The livestock provides an ample food and nutrition support to the people in the form of Milk, Eggs, and Meat. One of the main pillars of this sector is the considerable volume of data collected and compiled through the schemes, Livestock Census and Integrated Sample Survey. These data provide in-depth analysis and helps researchers and policy planners to bring out some key changes in the implementation of various schemes and programmes of Animal Husbandry sector.

The report contains tabulated data sets giving production estimates for major livestock products like Milk, Eggs, Meat and Wool. It also comprises of livestock population of different species by age, sex and uses, breed-wise population of major species of livestock etc. Fisheries statistics including inland and marine fish production and fisheries resources have also been added. Considering the immense importance of its utility for policy and planning purposes, the book is being published annually.

It is our hope that this publication, the 19th of the series, will be useful for administrators, policy planners, veterinarians, scientists, research organizations, Government agencies and other involved in the development of the Livestock sector. I congratulate Mr. Pradip De, Adviser(Stat) and his team for their strenuous effort in bringing this publication annually.

PREFACE

Livestock is an integral part of Indian economy, contributing more than 25% of total Agricultural GVA. Livestock rearing is one of the most important activities in rural areas of the country providing supplementary income to the families dependent on agriculture activities. Livestock potential in India is huge.

The "Basic Animal Husbandry and Fisheries Statistics – 2018" contains detailed tabulated data sets of production estimates for Milk, Egg, Meat and Wool up to the year 2017-18, consequent to the outcome of Integrated Sample Survey conducted during the period 1st March 2017 to 28th February 2018. The book also contains certain information available in the Department of Animal Husbandry, Dairying & Fisheries, Ministry of Agriculture & Farmers' Welfare, Ministry of Statistics and Programme Implementation and other in line Ministries and departments, which are responsible for formulation of any policy in the Livestock Sector. It contains statistics from National Accounts Division, Central Statistics Office, Directorate of Economics and Statistics, Department of Agriculture and Cooperation, Land and Population Statistics of the Office of Registrar General of India, Labor Bureau etc.

The Publication contains salient features of production estimates, gross value added, gross input/output and other technical aspects of Integrated Sample Survey besides the graphical presentation of data in the report. Chapter 1 to 3 of the report deals with the detailed tabulated datasets of various disciplines such as production of Milk, Eggs, Meat and Wool respectively. Chapter 4 and 5 sets out population of livestock as per Livestock Census (2007 & 2012) and breed-wise respectively, Chapter 6 deals with the expenditure plan and growth rates, Chapter 7 discusses about the GDP/GVA of livestock sector, Chapter 8 of the report is comprehensive Animal Husbandry Statistics, Chapter 9 furnishes Fisheries Statistics; the miscellaneous information collected from various departments is listed in Chapter 10. A glimpses on the latest World Livestock Statistics is also presented under Chapter 11.

Collection and compilation of a voluminous data to develop this document is a gigantic task that involved sincere and dedicated efforts of all States/UTs and Central Government's Officer/Officials. Their efforts are appreciated and acknowledged. Appreciations are also due to Shri Ajith Kumar N (Director), Shri Pradip Ray (Deputy Director), Ms. Pankhudi Shukla (Assistant Director), Smt. S. Indira (SSO), Shri Jitender Kumar (Executive Assistant) and Shri Hardeep (Office Assistant) for examining the accuracy of the data and its timeliness.

Though extreme care has been taken in the preparation of this report, possibility of some errors and omissions, however, cannot be ruled out. I would be glad to have comments and suggestions for its improvement in future.

SALIENT FEATURES

1. Introduction to Integrated Sample Survey

1.1 Integrated Sample Survey: India is endowed with the largest livestock population in the world. Livestock rearing is one of the most important economic activities in the rural areas of the country providing supplementary income for most of the family's dependent on agriculture. Apart from providing a subsidiary income to the families, rearing of livestock such as cattle, buffaloes, sheep, goats, pigs, poultry etc. is a source of protein supplement to the family members of the household in the form of milk, eggs and meat. Animal Husbandry and Dairying Programme have attained considerable importance in various Five Year Plans and several schemes/projects have been taken up by the States and the Centre for the development of this sector. In order to make an objective assessment of these projects and evaluate their impact, the need for reliable and correct data is utmost essential. Timely availability of reliable and current data relating to various indicators is essential for monitoring, evaluating and evolving policies for various developmental activities in this sector.

1.2 Initiatives in Livestock sector to bridge data gap: A Centrally Sponsored Scheme "Strengthening of Arrangements of Animal Husbandry Statistics in States/UTs" to construct a data base and information system for estimates of major livestock products like milk, egg, wool and meat and other related statistics, was taken up during the second year of the Fifth Five Year Plan (1974-1979). Thereafter, during the Sixth Plan (1980-1985) a new scheme known as "Integrated Sample Survey for the Estimation of Production of Major Livestock Products" was formulated and emphasis was given not only for preparation of State-level estimates, but also District-level estimates. Towards the end of 10th Five Year Plan, it was made a Central Sector Scheme. This is the only scheme through which considerable data, particularly on the production estimate of major livestock products, is being generated for policy formulation in the livestock sector. Information on number of Veterinary Institutions, State farms and other infrastructures, number of Artificial Insemination performed and other animal husbandry statistics is also compiled under the scheme.

1.3 Regulation of financial resources: The major components of the scheme are: (i) Salary, (ii) TA/DA, (iii) IT Solutions and (iv) Training. As per the scheme guidelines 100% financial assistance is provided to all States/UTs for all components other than Salaries. In the Twelfth Five Year Plan, the scheme has been modified by enhancing its norms for fund allocation to various States especially North Eastern States (NER). The present funding pattern of the scheme is to the tune of 50% to all States other than NER States, 90% central assistance to NER States and 100% to all Union Territories.

1.4 Coverage: The Survey is conducted in the entire rural areas of States/UTs. As a general principle, the survey is targeted to cover around 5% village in every season taking into account a total 15% villages, nearly

96,000 villages in a year. Since the year 2016-17, the survey covered urban areas too wherein 2 urban wards of each districts are selected at random for estimation of production of major livestock products.

1.5 Period of Survey: The Survey is conducted from March to February. The entire period of one year is divided into three Seasons of 4 months each. These Seasons are:

| Name of the Season | Period of survey |
|--------------------|--|
| Summer Season | 1 st March to 30 th June (122 days) |
| Rainy Season | 1 st July to 31 st October (123 days) |
| Winter Season | 1 st November to 28 th or 29 th February (120 days or 121 days in a leap year) |

This helps in building up progressive estimates of aggregate as well as also takes care of seasonality, if any, in the character(s)/parameters under study.

1.6 Sampling Design & Estimation Procedure: The sampling design is a stratified three stage design with district as stratum. The first stage units are villages or urban wards, second stage units are households and third and ultimate stage units are animals. The list of villages as per the latest Livestock Census constitutes the sampling frame. For the estimation of livestock numbers, as a general principle 15% of the villages/wards were selected (5% in each season) by using Simple Random Sampling without Replacement (SRSWOR). *However, this principle will vary according to the number of villages in the District. Further, 5 villages/wards were selected from each sub-sample for detailed study for collection of information on yield at the district level.* A detailed instruction manual had been circulated to all States/UTs for selection of sample villages, households and animals along with formulae for calculation of estimates.

1.7 Human Resources: Financial assistances have been provided to the States on a sharing basis as mentioned in Para 1.3 for nearly 1336 regular posts. The staffs deployed under the scheme in various States/UTs are given below:

| Post | Sanctioned | In positon | Shortall |
|-------------------------------------|-------------|------------|------------|
| Joint Director | 23 | 6 | 17 |
| Deputy Director | 58 | 10 | 48 |
| Assistant Director | 159 | 78 | 81 |
| Supervisor-cum- Data Entry Operator | 313 | 104 | 209 |
| Enumerators | 720 | 540 | 180 |
| Computer Operator | 63 | 59 | 4 |
| Total | 1336 | 797 | 539 |

1.8 Technical Committee of Direction for Improvement of Animal Husbandry Statistics (TCD): The scheme Integrated Sample Survey is evaluated every year by the Technical Committee of Direction for Improvement of Animal Husbandry Statistics (TCD constituted under the Chairmanship of Animal Husbandry Commissioner, DADF). The Committee meets once in every year to evaluate the progress of the scheme. The recommendations of the committee are implemented by all States/UTs Animal Husbandry Departments and Action taken report is submitted to the TCD in its subsequent meeting.

2. Gross Value Added of Livestock and Fisheries Sectors

The percentages contribution of livestock in terms of Gross Value Added in Agriculture Sector at Current and Constant price are given in the following table.

Table 2.1: Percentage contribution of Livestock in total Agriculture GVA

| Year | GVA at Constant (2011-12) Basic Prices | | | | | GVA at Current Basic Prices | | | | |
|---------|--|----------------|-----------------|----------------|--------------------------|-----------------------------|----------------|-----------------|----------------|--------------------------------|
| | GVA - Agriculture | | GVA - Livestock | | | GVA - Agriculture | | GVA - Livestock | | |
| | (Rs. In Cr.) | % to total GVA | (Rs. In Cr.) | % to total GVA | % to Agriculture Sector* | (Rs. In Cr.) | % to total GVA | (Rs. In Cr.) | % to total GVA | % to total Agriculture Sector* |
| 2012-13 | 983809 | 11.5 | 344375 | 4.0 | 22.6 | 1088814 | 11.8 | 368823 | 4.0 | 22.0 |
| 2013-14 | 1037060 | 11.4 | 363558 | 4.0 | 22.6 | 1248776 | 12.1 | 422733 | 4.1 | 21.9 |
| 2014-15 | 998425 | 10.3 | 390449 | 4.0 | 24.3 | 1292874 | 11.2 | 510411 | 4.4 | 24.4 |
| 2015-16 | 966345 | 9.2 | 421369 | 4.0 | 26.1 | 1327997 | 10.6 | 584070 | 4.6 | 26.2 |
| 2016-17 | 1033008 | 9.2 | 448964 | 4.0 | 26.2 | 1530137 | 11.1 | 639912 | 4.6 | 25.8 |

*It includes crops, forestry, livestock and fishing

Source: CSO, MoSPI

The share of Gross Value Added of livestock sector to the Agriculture Sector (Crops, Forestry, Livestock and Fishing) has increased from 22.6% in 2012-13 to 26.2% in 2016-17 at Constant prices while at Current prices, the share has increased from 22.0% in 2012-13 to 25.8% in 2016-17.

3. MILK PRODUCTION

Milk and milk products are the essential food items of human beings that provide sufficient nutritional supplements especially to the children. The milk production in the country was 17.0 million tonnes during 1950-51. A number of initiatives under-taken by the government that helped in improving the productivity of milk over the period. A trend showing the increase in milk production over the past few decades is depicted in the **Graph 3.1**. The graph shows there is a consistent increase in the production of milk over the years. The milk production has increased from 165.4 million tonnes in 2016-17 to 176.3 million tonnes in 2017-18 registering a growth of 6.6%. Also, the per capita availability of milk was at 130 gm/day in 1950-51. There has been steady increase in per capita availability of milk since 2000-01 with a marginal fluctuation in the previous periods.

However, the per capita availability has sharply increased from 233 gm/day in 2004-05 to 352 gm/day in 2016-17 as illustrated in the Graph 3.1. The analysis shows that during the 11th Five Year Plan (2007-08 to 2011-12) the per capita availability of milk has increased from 260 gm/day to 290 gm/day. In the 12th Five Year Plan, the per capita availability of milk was 299 gm/day in 2012-13 has gone up to 355 gm/day in 2016-17. However, it has further increased to 375 gm/day during 2017-18.

* Based on 2001 Human Census Projected Population.

Species-wise Milk Contribution

The Graph 3.2 shows the contribution of milk production by Cattle, Buffalo and Goat. The analysis shows nearly 35% of the total milk production is contributed by Indigenous Buffaloes followed by 26% by crossbred cattle. The Indigenous cattle contribute 10% of the total milk production in the country whereas Non-descript cattle contribute 10% and non-descript buffaloes contribute 14% of the total milk production in the country. Goat milk shares a contribution of 4% in the total milk production across the country.

GRAPH 3.3: ANNUAL GROWTH RATE OF MILK PRODUCTION

Graph 3.3 indicates the annual growth rate of milk production for the past five reference periods. The annual growth rate shows a steady increase from the year 2013-14 and in the current year 2017-18. The milk production registered an annual growth of 6.6%. The consistent growth in the total milk production of the country accounts to the various initiatives taken to increase the milk production to support

the increasing population. State-wise analysis in the growth pattern of milk production during 2017-18 is depicted in **Graph 3.4**. It is observed that 14 States have registered growth of more than 6% in the milk production. Amongst them 10 States namely Andhra Pradesh, Madhya Pradesh, Haryana, Tripura, Karnataka, Sikkim, Rajasthan, Chhattisgarh, Goa and Maharashtra have crossed the national average growth rate of milk production i.e. 6.6%.

Graph 3.5: Percentage Share of Milk Production of Selected States for the year 2017-18

The State-wise share of milk production vis-a-vis total milk production in the country is given in the **Graph 3.5**. The largest producer of milk is Uttar Pradesh with 16.5% of the total milk production in the country followed by Rajasthan that produces 12.7% of the total milk production. Madhya Pradesh, Andhra Pradesh and Gujarat stand as the third, fourth and fifth largest milk producing states that produce 8.3%, 7.8% and 7.7% of the total milk produced in the country respectively.

The **Graph 3.6** shows State-wise variation in total milk production during 2013-14 to 2017-18. It is observed that states like Uttar Pradesh, Rajasthan, Madhya Pradesh, Andhra Pradesh, Gujarat, Punjab, Maharashtra, Haryana, Bihar, Tamil Nadu and Karnataka had a progressive trend in the production of milk while Uttar Pradesh remained the largest producer of milk during the entire period.

Graph 3.6: Milk Production during 2013-14 to 2017-18 of selected States

#includes Telangana till 2013-14

Per Capita Availability of Milk during 2017-18

The **Graph 3.7** below shows the per-capita availability of milk during 2017-18 in various States/UTs including the All India average. The graph shows that 9 States are having per-capita availability more than the national average with highest per-capita availability in Punjab. It is observed that the success of the initiatives taken to increase the milk production in view of increasing population is highlighted with the constant increase in the per capita availability of milk across the country.

Graph 3.7: State-wise Per capita availability of Milk for the year 2017-18*

*Based on Projected Population with Base on 2001-Human Census.

4. EGG PRODUCTION

Poultry development is one of the important activities in livestock sector. The total egg production in the country was at 1832 million in the year 1950-51 and since then the production of egg continues to rise over the period, as depicted in **Graph 4.1**. It

can be observed in the graph below, there has been steady increase in production of egg up to the year 1999-2000. From the year 1999-2000 onwards the production of egg improved substantially and it reached 95.21 million in the year 2017-

GRAPH 4.1: PRODUCTION & PER CAPITA AVAILABILITY* OF EGG (ALL INDIA)

18. The per capita *Based on 2001-Human Census Projected Population.

availability was 5 eggs per annum during the period 1950-51. There has been steady increase in per capita availability of egg since then till 2017-18 with marginal fluctuations in the intermittent periods. The per capita availability reached at 74 eggs per annum in the year 2017-18 from 69 eggs per annum from previous year 2016-17.

Species-wise Egg Contribution

The **Graph 4.2** showing the contribution of egg production by Fowl and Duck. The graph shows Improved Fowl contribute 86.99% of the production of egg and 11.83% is from Desi Fowls with respect to total production of egg. The Desi Duck and Improved Duck contribute 0.91% and 0.26% respectively with respect to total egg production.

Graph 4.2: Species-Wise Egg Contribution in 2017-18

GRAPH 4.3: ANNUAL GROWTH RATE OF EGG PRODUCTION

The **Graph 4.3** shows the annual growth rate of egg production during the period 2013-14 to 2017-18. The annual growth rates crossed over 6% in three times during the interval. As compared to 2016-17, the growth rate of the current year 2017-18 also shows a significant improvement in the egg production with the growth registered as 8.03%.

State-wise analysis in the growth pattern of egg production during 2017-18 is depicted in **Graph 4.4**. Nine States have crossed the national average growth rate and significant growth in the egg production is seen in the case of West Bengal, Madhya Pradesh, Tripura, Andhra Pradesh and Arunachal Pradesh. It is also observed that 14 States have registered growth above 6% this year in case of Egg production.

Graph 4.4: Annual Growth Rate of Egg Production in 2017-18 of selected State/UTs

An analysis showing the state-wise share of egg production vis-a-vis total egg production in the country is given in the **Graph 4.5** below. The largest producer of egg is Andhra Pradesh which produces 18.7% of the total egg production in the country followed by Tamil Nadu that produces 18.3% of the total egg production. Telangana is the third largest egg producing state in the country with a share of 13.3% of the total egg production

in the country. Some other States that contribute more than 5% in the total egg produced across country are West Bengal, Maharashtra, Haryana, Karnataka and Punjab.

State-wise analysis as depicted in **Graph 4.6** below shows that, during the period 2013-14 to 2017-18, there is a steady increase in the production of egg in all States except for the States like Kerala, Odisha, Rajasthan and Jharkhand where the trend in the production estimates marginally fluctuates.

Graph 4.5: Percentage Share of Egg Production of selected States for the year 2017-18

Graph 4.6: Egg production during 2013-14 to 2017-18 of selected States

Includes Telangana till 2013-14.

State-wise Per Capita Availability of Egg

The **Graph 4.7** below shows the per-capita availability of egg during 2017-18 in various States/UTs including the All India average. The graph shows that only 6 States are having per-capita availability more than the national average.

Graph 4.7: Per Capita Availability of Eggs for the year 2017-18 of selected States*

*Based on Projected Population of 2001-Human Census.

5. MEAT PRODUCTION

The **Graph 5.1** shows the situation of meat production in the country with a steady increase from 2007-08 onwards and the production witnessed a leap in the same year due to inclusion of Commercial meat production. The total meat production in the country is pegged at 7.7 million tonnes in the year 2017-18, which marks a significant progress in the meat production.

Species-wise Meat Contribution

The Graph 5.2 shows the contribution of meat production from Cattle, Buffalo, Sheep, Goat, Pig and Poultry in the total meat produced across the country during 2017-18. The diagram shows that nearly 50% of meat production is contributed by Poultry. Buffalo, Goat, Sheep, Pig, and Cattle contributes nearly 19%, 14%, 8%, 5% and 5% of meat production respectively to the total meat production of the country.

The trend in the annual growth rate of meat production is given in the **Graph 5.3**. The annual growth rate for the year 2017-18 is 3.66%, which is less than the growth rate of previous year i.e. 5.21%. The reason for this lower growth accounts to the decreased meat production during 2017-18 in the major meat producing State i.e. Uttar Pradesh. The State has mentioned that this huge downfall in the meat production is because of less number of active slaughterhouses reported during 2017-18 as compared to the numbers reported during the year 2016-17.

Graph 5.4 shows that the state-wise variation in the annual growth rate of meat production during 2017-18. This year, the State of Goa has registered the highest annual growth rate i.e. 16.7%. The reason for this double-digit growth in meat production of the State during 2017-18 is due to the full-fledged functioning of Goa Meat Complex, which was partially active during previous years. Among the other States, 12 States have reported their growth over 7% and more than 21 States/UTs have registered growth more than the national average growth rate during 2017-18. The Uttar Pradesh being the major meat producing State registered has negative growth of (-) 14.5 % during 2017-18.

The state-wise share of meat production vis-a-vis total meat production in the country is given in the **Graph 5.5**.

The largest meat producing State is Uttar Pradesh that produces 15% of the total meat produced in the country followed by Maharashtra that produces 12% of the total meat production. West Bengal is the third largest meat producing state in the country that produces nearly 10% of the total meat production in the country.

Graph 5.5: Percentage share of Meat Production in selected States in 2017-18

The State-wise analysis showing the trend in meat production over the period 2013-14 to 2017-18 is depicted in the **Graph 5.6** below. During these five years, most of the states have shown increasing trend in the production of meat. Uttar Pradesh reported decline in the meat production this year 2017-18 as well, though it remained on the top in the previous years as well as this year in the production of meat.

Graph 5.6: Meat Production during 2013-14 to 2017-18 in selected States

#Includes Telangana till 2013-14.

6. WOOL PRODUCTION

The total wool production in the country was at 27.5 million kg during 1950-51. As per Graph 6.1, there has been consistent increase in production of wool till 2002-03 and thereafter there were consistent reduction in the production estimate. The production has further improved consistently till 2006-07 and further shown

GRAPH 6.1: PRODUCTION OF WOOL (ALL INDIA)

a decreasing trend till 2008-09 and during 2009-10 to 2014-15, the production has increased from 43.1 million kg to 48.1 million kg. However, the wool production has further declined to 41.5 million kg. during 2017-18.

Category-wise share of Wool Production

Graph 6.2, shows the contribution of wool production by Ram/Wether, Ewe and Lamb in the total wool production during the year 2017-18. The analysis shows Ewes contribute 67.71% of the total wool production whereas Ram/Wether and Lamb contributes only 17.10% and 15.19% respectively in the total wool produced across the country. Due to lesser population as reported for the lamb shorn and Ram/Wether the production of wool from them is comparatively less to the wool produced from the Ewes.

Graph 6.3: Annual Growth Rate of Wool Production

Graph 6.3 shows the change in production of wool during the year 2013-14 to 2017-18. From the year 2013-14, there is a declining trend in the growth of wool production as has been observed from the graph. The wool production has witnessed a larger negative growth during 2015-16 and registered as (-) 9.47%. During the year

2017-18 the total wool production in the country has, however again, registered a negative growth of (-) 4.78%.

From Graph 6.4 below it can be seen that Bihar has the highest annual growth rate among the states which is 6.13% followed by Punjab registering a growth of 5.12% and Jharkhand with 5.03% in the year 2017-18. However, many leading wool producing States show negative growth in the production as depicted in the graph.

Graph 6.4: Annual Growth Rate of Wool Production of selected States in 2017-18

The **Graph 6.5** depicts, percentage share of wool production in selected major wool producing States. Rajasthan is the largest producer of wool in the country that contributes 34.5% of the total wool production followed by Jammu & Kashmir with a share of 18.1%. Telangana is the third largest wool producer state that has share of 10.9% of the total production in the year 2017-18.

includes Telangana till 2013-14.

As depicted in **Graph 6.6** below there has been varying trend in the production of wool across various States during the period 2013-14 to 2017-18. Rajasthan is the largest producer of wool throughout the period 2013-14 to 2017-18.

7. INFRASTRUCTURE & TARGET

The **Graph 7.1** shows the target set for the production of Major Livestock Products (MLP) for the year 2017-18 has been achieved in case of egg, meat and wool products, whereas in case of milk production achievement has lacked marginally behind the set target. The percentage achievement in Milk Production (All India) is 97.8%. The production of Meat has marked a 119.8% achievement of the set target. The production of egg achieved the set target with 100.7% of the target. In case of wool, this year the production has achieved the set target registering nearly 100.0% achievement.

Infrastructure of Animal Husbandry Sector

The infrastructure of animal husbandry sector is a key area that support for its accelerated growth. **Graph 7.2**, shows there are 25263 Veterinary Dispensaries and 27628 Veterinary Aid Centres, while 12099 Veterinary Hospitals in our country. For an accelerated growth of Livestock sector strengthening of infrastructure is must.

Graph 7.2: Classification of Veterinary Institutions in India as on 31.03.2018

Graph 7.3: Number of Artificial Inseminations Performed (All India)

Artificial insemination is not merely a novel method of bringing about impregnation in females. Instead, it is a powerful tool mostly employed for livestock improvement. **Graph 7.3** shows the growth in adoption of this methodology over the years in our country. By adoption of artificial insemination, there would be considerable reduction in both genital and non-genital diseases in the farm stock. It can be observed

that the number of artificial inseminations performed in the country has been increased from 70.06 millions in 2016-17 to 73.07 millions in 2017-18.

CHAPTER-I
MILK PRODUCTION

Table 1: Estimates of Production and Per Capita Availability of Milk during 1950-51 To 2017-18 -All India

| Year (March to February) | Milk Production (million tonnes) | Human Population (million nos.) | Per Capita Availability (gram./day) |
|-----------------------------|-------------------------------------|------------------------------------|--|
| 1950-51 | 17.0 | 359 | 130 |
| 1955-56 | 19.0 | 393 | 132 |
| 1960-61 | 20.0 | 434 | 126 |

| Total Expenditure (In Rs.) | 486.2 | 494.9 | 498.3 | 531.5 | 555.6 | 564.7 | 854.9 | 914.6 | 932.8 | 1012.0 | 1022.7 | 1060.2 |

Note: Per capita expenditure depends upon reference periods; utmost care should be taken before comparing the figures of the different rounds (temporal changes). For example, NSS 55th round, figures were derived using Mixed Reference Period-MRP (URP data was not available for NSS 55th round). Similarly in NSS 60th round, two types of schedules were used for data collection (Type I& II) and figures given under 58th round were based on sch. Type I (MRP estimates).

Note: 1. In NIC 2008, the activity 'animal production' is for NIC 2008 code 014 and in NIC 1998/NIC 2004 the term used is 'farming of animal' (NIC code 012). The coverage of NIC 2008 code 014 and NIC 1998/NIC 2004 code 012 is same.

2. In NIC 2008, the activity 'support activities to agriculture and post-harvest crop activities' is for NIC 2008 code 016 and in NIC 1998/NIC 2004 the term used is 'agricultural and animal husbandry service activities, except veterinary activities' NIC code 014. The coverage of NIC 2008 code 016 and NIC 1998/NIC 2004 code 014 are not same and the figures may not be exactly comparable.

CHAPTER- X
MISCELLANEOUS

Table 92: Human Population From 1901 To 2011

| Year | Population | Decadal Growth Rate (%) | Average Annual Exponential Growth Rate (%) | Progressive Growth Rate over 1901 (%) |
|-------------|-------------------|--------------------------------|---|--|
| 1901 | 238,396,327 | - | - | - |
| 1911 | 252,093,390 | 5.75 | 0.56 | 5.75 |
| 1921 | 251,321,213 | (-) 0.31 | (-) 0.03 | 5.42 |
| 1931 | 278,977,238 | 11 | 1.04 | 17.02 |
| 1941 | 318,660,580 | 14.22 | 1.33 | 33.67 |
| 1951 | 361,088,090 | 13.31 | 1.25 | 51.47 |
| 1961 | 439,234,771 | 21.64 | 1.96 | 84.25 |
| 1971 | 548,159,652 | 24.8 | 2.2 | 129.94 |
| 1981 | 683,329,097 | 24.66 | 2.22 | 186.64 |
| 1991 | 846,421,039 | 23.87 | 2.16 | 255.05 |
| 2001 | 1,028,737,436 | 21.54 | 1.97 | 331.52 |
| 2011 | 1,210,854,977 | 17.70 | 1.63 | 407.92 |

Notes :

In working 'Decadal Growth' and 'Percentage Growth'. For India 1941-51 and 1951-61 the population of Tuensang district for 1951 (7,25) and the population of Tuensang (83,501) and Mon (5,774) districts for 1961 Census of Nagaland state have not been taken into account as the area were censused for the first time in 1951 and the same are not comparable.

1. In 1981, census was not conducted in Assam, based on the 1971 results and the final 1991 census the population of Assam as on March 1, 1981 has been interpolated.
2. The 1991 census has not been conducted in Jammu & Kashmir. Hence the population figures for India include the population figure for J & K worked out by interpopulation.
3. Includes estimated population of Paomata, Mao Maram and Purul sub-divisions of Senapati District of Manipur for 2001.
4. The percentage decadal growth show in column 4 of Statement 2 indicates a decline from 24.80 percent during the decade 1961-71 to 24.66 percent during the decade 1971-81, while the average annual exponential growth rate presented in column 7 of this statement shows an increase from 2,20 to 2,22. This is because the percent decadal variation has not been adjusted for the shift in reference data in 1971. The decadal variation for 1961-71 related to 121 months while that 1971-81 relates to 119 months. If we adjust for the difference, the percentage decadal growth works out to 24.59 percent for 1961-71 and 24.87 percent for the decade 1971-81.
5. The 1971 census was conducted with 1 April, 1971 as the reference date. In both the 1961 and 1981 censuses the reference date was 1 March. The average annual exponential growth rate presented in the statement takes into account this difference. No such adjustment has been made while calculating decadal growth rate.
6. In Arunachal Pradesh the census was conducted for the first time in 1961. While working out the decadal growth, both absolute as well as per cent for 1951-61, 1961 census population of Arunachal Pradesh has been excluded.

Source: Office of the Registrar General & Census commissioner, India.

Table 93: Sex Ratio From 1901-2011

| Census Year | Sex Ratio (no. of females for 1000 males) |
|-------------|--|
| 1901 | 972 |
| 1911 | 964 |
| 1921 | 955 |
| 1931 | 950 |
| 1941 | 945 |
| 1951 | 946 |
| 1961 | 941 |
| 1971 | 930 |
| 1981 | 934 |
| 1991 | 926 |
| 2001 | 933 |
| 2011 | 943 |

Note:

1. 1981- Includes interpolated population of Assam.
2. 1991- The 1991 census was not held in J & K. For working out sex ratio for India the population for J & K has been worked out by interpopulation.
3. The figures for India and Manipur include by sex, the estimated population of Paomata, Mao Maram and Pural sub- divisions of Senapati district of Manipur for Census 2001.

Source: Office of the Registrar General & Census Commissioner India.

Table 94: Literacy Rate From 1951-2011

| Year | Persons | Males | Females |
|------|---------|-------|---------|
| 1951 | 18.33 | 27.16 | 8.86 |
| 1961 | 28.3 | 40.4 | 15.35 |
| 1971 | 34.45 | 45.96 | 21.97 |
| 1981 | 43.57 | 56.38 | 29.76 |
| 1991 | 52.21 | 64.13 | 39.29 |
| 2001 | 64.83 | 75.26 | 53.67 |
| 2011 | 73 | 80.9 | 64.60 |

Note: 1951- Excluding the population of J & K, Pondicherry and NEFA, D & N. Haveli and Goa, Daman & Diu.

1961- Excluding Goa, Daman & Diu, NEFA.

1981- Excluding Assam

1991- Excluding J & K.

1. Literacy rate for 1951, 1961 and 1971 relate to population aged five years and above. The rate for the years 1981 and 1991 relate to the population aged seven years and above. The literacy rate for the population aged five years and above in 1981 has been shown in brackets.
2. The 1981 rates exclude Assam where the 1981 census could not be conducted. The 1991 census rate excludes J & K where census could not be undertaken.
