59.	Share of Agriculture and Livestock Sector in GDP –at constant prices	86
60.	Share of Agriculture and Livestock Sector in GDP-at current prices	87

PART-VII ANIMAL HUSBANDRY STATISTICS

61.	Disease wise Incidence of Livestock Diseases in India During the Year 2010 (January-December)	91-92
62.	Import of Livestock and Livestock Products from 2009-10 to 2010-11	93-94
63.	Export of Livestock and Livestock Products from 2009-10 and 2010-11	95-96
64.	Value of Import of Livestock and Livestock Products during 2009-10 to 2010-11	97
65.	Value of Export of Livestock and Livestock Products during 2008-09 to 2009-10	97
66.	Area under Fodder Crops and Permanent Pastures and other Grazing Lands 2004-05 to 2007-08-State wise	98
67.	Value of Consumption of Broad groups of items per person for a period of 30 days –All India	99-100
68.	Percentage value of Consumption of Broad Groups of items for period of 30 days – All India	101-102

69.	Percentage Distribution of Monthly Per Capita expenditure by Groups of Consumption Items Over NSS Rounds	103-104
70.	Distribution of usually working persons in farming of animal and Agriculture and Animal Husbandry Service activities, except Veterinary activities.	105
71.	Number of veterinary institutions—State wise	106
72.	State Farms and Other Infrastructures	107-111
73.	Artificial Insemination Performed During 2007-08 to 2010-11- State wise	112

PART VIII DAIRYING STATISTICS

74.	Number of Dairy Plants, State wise, Registered under MMPO (1992) - As on 31 st March, 2011	115
75.	Achievement of some of the Key Components of Dairy Development in Different States Under Cooperative Sector as on 31.12.2011	116

PART IX MISCELLANEOUS

76.	Human Population 1901-2011	119
77.	SEX Ratio 1901-2011	120
78.	Literacy Rate : 1951-2011	120
79.	Number of Districts, Blocks and Villages in the Country	121
80.	Revised Estimates of Percentage of Population Below Poverty Line in Urban and Rural Areas – 2004-05—State wise (Based on Tendulkar Methodology)	122
81.	Distribution of Operational Holding (2005-06)-All India	123
82.	Distribution of Livestock According to Size of the Holding During 2006-07—All India	124
83.	Number and Area of the Operational Holdings in India from 1970-71 to 2005-06	125
84.	Distribution of Number and Area of the Operational Holdings and Area Operated by Major Size Classes of Holdings in 1990-91 to 2000-01	125
85.	Average Size of holding by Major Size Classes in India During All Agriculture Census years	126
86.	Index Number of Wholesale Prices of All Commodities Food Articles and Livestock Product	127
87.	All India Consumer Price Index Numbers	128-131
88.	Number of Animals Insured Under the Livestock Insurance Scheme of DADF	132

PART-X WORLD STATISTICS

89.	World Livestock Population -2000-2010	135
90.	World Estimates of Milk Production -1990 to 2010	136
91.	Production of Cow Milk by Major countries of the world-2007-10	137

Foreword

The Department of Animal Husbandry, Dairying and Fisheries publishes "Basic Animal Husbandry Statistics" biennially. The present publication is the 13th in the series. It contains estimates of major livestock products (milk, eggs, meat and wool), data on livestock population, and other related matters. It is hoped that this will be useful for administrators, policy planners, veterinarians, scientists, research organizations, Government agencies and others involved in the development of the livestock sector.

Preface

The "Basic Animal Husbandry Statistics-2012" contains estimates upto 2010-11 on major livestock products which are based on the "Integrated Sample Survey for Estimation of Major Livestock Products", carried out by the various State Animal Husbandry Departments. Anticipated achievements for these products for 2011-12 are also included. The information on livestock population is as per the Livestock Census-2007.

Organization of a voluminous data to develop this document has been a gigantic task that involved sincere and dedicated efforts of several State and Central agencies, which are appreciated and acknowledged. Appreciations are also due to Shri A.K. Mathur, Adviser (Statistics), Shri Kal Singh, Director, Smt Jayasree M G, Director, Dr. Subhra Sarker, Deputy Director, Shri Alok Nigam, Assistant Director and Shri Brij Mohan Gupta, Assistant Director in the Statistics Division of this Department, for painstaking efforts to observe timeliness.

Though extreme care has been taken in the preparation of this report, possibility of some errors and omissions, however, cannot be ruled out. I would be glad to have comments and suggestions for its improvement in future.

A Technical Note on Basic Animal Husbandry Statistics-2012

The Department of Animal Husbandry, Dairying & Fisheries is regularly bringing out "Basic Animal Husbandry Statistics" as biennial publication. The publication provides time series data on production estimates of major livestock products, i.e, milk, eggs, wool and meat and also live-stock population- species wise.

The current report is thirteenth in the series and contains ten parts. The production of major livestock products is estimated on the basis of annual sample surveys conducted by State Animal Husbandry Departments under a Central Sector Scheme: 'Integrated Sample Survey'. The surveys are conducted in three seasons – Summer, Rainy and Winter. The estimates of major livestock products are approved by "Technical Committee of Direction for improvement in Animal Husbandry & Dairying Statistics" (TCD), which meets regularly.

Results of Livestock Census-2007 were finalized by most of the States in 2010. As the number of animals in production (milk, egg & meat) as estimated through Integrated Sample Survey during 2007-08 were not found consistent with the Livestock Census-2007 results, production estimates of Major Livestock Products (MLP) for the year 2007-08 to 2009-10 were revised. The revised estimates were approved in the meeting of TCD in 2011 and subsequent group meeting under the Chairmanship DG, CSO. Thereby, estimates of MLP for the year 2006-07 onwards as published in BAHS-2010 stand revised.

The Part I of the BAHS-2012 contains estimates of milk production up to 2010-11. Milk production is anticipated to reach 127.3 million tonnes at the end of 11th Plan (2011-12) as compared to 121.8 million tonnes in 2010-11 and 107.9 million tonnes at the beginning of the 11th Plan (2007-08). The per capita availability of milk has increased from 260 gram per day in 2007-08 to 281 gram per day in 2010-11. The shares of milk production in 2010-11 by exotic/crossbred cows, indigenous/non descript cows, buffaloes and goats was 24.3 %, 20.8 %, 51.2 % and 3.8 % of total milk production respectively.

The Part II of the BAHS-2012 contains estimates of eggs production. Eggs production is anticipated to reach 65.5 billion numbers at the end of 11th Plan (2011-12) as compared to 63.0 billion numbers in 2010-11 and 53.6 billion numbers at the beginning of 11th Plan (2007-08). The per capita availability of eggs has increased from 47 eggs per annum in 2007-08 to 53 eggs per annum in 2010-11.

The Part III of the BAHS-2012 contains data on wool and meat production. Wool production at the end of 11th Plan (2011-12) is anticipated to be 44.4 million kilograms. It has decreased from 43.9 million kilograms at the beginning of 11th Plan (2007-08) to 43.0 million kilograms in 2010-11. The data on various types of animals slaughtered, their average yield rate and meat production up to 2010-11 have been included in this part. Meat production including poultry meat was estimated at 4.9 million tonnes in 2010-11 as compared to 4.0 million tonnes in 2007-08. Meat production reported upto for the year 2006-07 did not include data from commercial poultry farms since such information was not available; explaining the sudden increase in meat production from 2.3 million tonnes in 2006-07 to 4 million tonnes in 2007-08.

The Part IV of the BAHS-2012 is devoted to the results of 17th Livestock Census 2003 and 18th Livestock Census 2007 (derived from Village level totals). In the 18th Livestock Census 2007, for the very first time digital data up to the household level has been processed at the central level through the National Informatics Centre. The table on livestock population from 1951 to 2007 shows that cattle population in the country was increasing till 15th Livestock Census 1992. However, cattle population decreased from 204.58 million in 1992 to 198.88 million in 1997 and further decreased to 185.18 million in 2003. This increased to 199.08 million in 2007. Detailed data on Livestock population of 2003 and 2007 have been provided with comparisons. During the inter-censal period from 2003 to 2007, cattle population increased by 7.5%; buffalo by 7.6%; sheep, goat and yak by 16.4%, 13.0% and 28.0%, respectively. The population of mithun and pigs declined by 4.9% and 17.6% respectively. The population of camels, horses and ponies, mules and donkeys decreased by 18.2%, 18.6%, 22.1% and 32.6% respectively. Population of exotic and crossbred cattle registered a significant increase of 33.9% where as the indigenous cattle increased by only 3.4%. The exotic and crossbred milch cattle increased by 28.3%, indigenous milch cattle increased by 2.5% and milch buffaloes increased by 3.0%. The proportion of in-milk animals to the total milch animals has increased from 72.8% to 74.4% for crossbred cattle, from 59.0% to 63.9% for indigenous cattle and from 70.6 % to 73.3% for buffaloes.

While the growth rates of production and plan expenditures on various schemes of the Animal Husbandry and Dairy sectors are provided in part V of the report, the Gross Domestic Product of Livestock sector is provided in part VI. The contribution of Livestock sector in the National Economy at current prices was 3.6% in 2010-11. The value of output in 2010-11 from livestock sector was Rs. 3,88,370 crores at current prices, out of which Milk and Milk products was Rs. 2, 62,215 crores, meat was Rs. 64,310 crores and eggs was Rs. 15,123 crores.

The Part VII of the BAHS-2012 contains various data like incidence of livestock diseases, import and export of livestock and livestock products, value of consumption of various livestock products, employment in animal husbandry sector, veterinary institutions and other veterinary infrastructures etc. The data on "Artificial Insemination performed" is updated from the proceedings of TCD meeting held during September, 2011. While part VIII contains Dairying Statistics, in part IX of the report, miscellaneous data like human population, selected indicators of national economy are provided.

The Part X of the BAHS-2012 contains World Statistics based on Food and Agricultural Organization (FAO) Statistical Database. India ranks first in the milk production. A table on livestock numbers by World's top 10 countries based on 2010 data obtained from FAOSTAT Website is included.

1991	846,302,688	23.87	2.16	255.05
2001	1,028,737,436	21.54	1.97	331.52
2011*	1,210,193,422	17.64	1.64	407.64

Notes In working 'Decadal Growth and 'Percentage Growth'. For India 1941-51 and 1951-61 the population of Tuensang district for 1951 (7.25) and the population of Tuensang (83,501) and Mon (5,774) districts for 1961 Census of Nagaland state have not been taken into account as the area were censused for the first time in 1951 and the same are not comparable.

1. In 1981, census was not conducted in Assam, Based on the 1971 results and the final 1991 census the population of Assam as on March 1, 1981 has been interpolated.

2. The 1991 census has not been conducted in Jammu & Kashmir. Hence the population figures for India include the population figure for J & K projected by the Standing Committee of Experts on population projections (October, 1989)

3. Includes estimated population of Paomata, Mao Maram and Purul sub-divisions of Senapati District of Manipur for 2007.

4. Includes estimated population of Paomata, Mao Maram and Purul sub-divisions of Senapati District of Manipur for 2011.

5. The percentage decadal growth show in column 4 of Statement 2 indicates a decline from 24.80 percent during the decade 1961-71 to 24.66 percent during the decade 1971-81, while the average annual exponential growth rate presented in column 7 of this statement shows an increase from 2.20 to 2.22. This is because the percent decadal variation has not been adjusted for the shift in reference data in 1971. The decadal variation for 1961-71 related to 121 months while that 1971-81 relates to 119 months. If we adjust for the difference, the percentage decadal growth works out to 24.59 percent for 1961-71 and 24.87 percent for the decade 1971-81.

6. The 1971 census was conducted with 1 April, 1971 as the reference date. In both the 1961 and 1981 censuses the reference date was 1 March. The average annual exponential growth rate presented in the statement takes into account this difference. No such adjustment has been made while calculating decadal growth rate.

7. In Arunachal Pradesh the census was conducted for the first time in 1961. While working out the decadal growth, both absolute as well as per cent for 1951- 61, 1961 census population of Arunachal Pradesh has been excluded. * Census figures are provisional.
