I. Sanitary Information

The undersigned official veterinarian certifies that the ovine meat/ovine meat product described above satisfies the following requirements:

- i. The country of origin of raw material and final product is under negligible Bovine Spongiform Encephalopathy (BSE) risk in accordance with Chapter 11.4. of the WOAHA Terrestrial Code and is free from Scrapie, Foot and Mouth Disease (with or without vaccination), Vesicular Stomatitis and Rift Valley Fever as per WOAHA listing.
- ii. The product originates from disease free establishment, herd or flock and animals related to the diseases of source animal species including Nairobi Sheep disease, Border's disease, Tuberculosis, Sheep and Goat Pox, Blue tongue, Peste des petits ruminants, Ovine epididymitis, Caprine and Ovine brucellosis, Anthrax, Black-leg, Leptospirosis, Contagious agalactia, Echinococcus, Caprine arthritis/encephalitis, Contagious caprine pleuropneumonia, Malignant Catarrhal Fever, Ovine Chlamydiosis, Maedi-visna, Ecto and Endo parasitic infestation/infection during last 2 years.
- iii. The product come from establishments that are not placed under movement restrictions for the control of anthrax and where there has been no case of anthrax during the 20 days prior to slaughter.
- iv. The product originates from the animal which did not show any clinical sign and symptoms of any infectious/contagious diseases related to source animal species (as per para ii above) and had undergone ante- and post-mortem inspections with favourable results, which have been slaughtered for human consumption at an abattoir approved by the National Veterinary Authority of the country of origin in accordance with WOAHA Chapter 6.3.
- v. The product comes from source animals slaughtered in abattoirs /processing plants accredited for export by the National Veterinary Authority, where no bovine/porcine or poultry tissue/protein has been added to the lamb meat has been processed during production of fresh meat or added to the meat products at any stage during production and processing.
- vi. The product came from the animals which have not been kept in the infected zone and establishment for the diseases related to source animal species and have not been derived from the source animal species slaughtered/culled as part of an eradication/control program for any disease related to source animal species.
- vii. The product comes from an establishment that complies with biosecurity procedures in accordance with International Standards and Guidelines, good hygiene practices and Food Safety Standards for the control of foodborne pathogens including salmonella, campylobacter, yersinia and E.coli.

- viii. The establishment of production shall have the system of monitoring of the quantities and usage patterns of antimicrobial agents used in animals as per WOH Chapter 6.9 of TAHC and does not have residues of pesticides, drugs, mycotoxin and chemicals above the Maximum Residue Limits prescribed internationally.
- ix. The consignment(s) destined to India do not contain beef and beef products in any form. The source animals have never been fed with feeds produced by containing materials of internal organs, blood meal and tissues originated from cows and their progenies (except milk and milk products).
- x. The country of origin has system in place to demonstrate that the residues of pesticides, drugs, mycotoxins and chemicals in the meat and meat products are in compliance with the limits prescribed by the Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011 of India.
- xi. The product complies with the standards of sheep/goatmeat products including the microbiological requirements and food additives as specified under the Food Safety and Standards (Food Product Standards and Food Additives) Regulations, 2011 of India.
- xii. The entire consignment of meat or meat products is prepared, packed and transported prior to export under good hygienic practice and an effective food safety control system, implemented within the context of HACCP systems where appropriate and in accordance with the requirements specified in Schedule 4, as applicable, of the Food Safety and Standards (Licensing and Registration of Food Businesses) Regulations, 2011 (India) and such other guidelines as specified from time to time under the provisions of the Food Safety and Standards Act, 2006.
- xiii. Regular inspection/ monitoring of checks in according with FSS Act, 2006, rules and regulations made there under and as per the criteria specified by FSSAI.
 - a) Conditions for transport / storage: Frozen / Chilled / Ambient / _____.
 - b) Temperature required during storage and transportation:_____.
- xiv. Adequate precautions were taken after collection, processing and during transit to avoid contact and contamination of product with any potential source of infection related to source animal. The product is packed in new, fresh, clean packing material and the materials are not exposed to any products with potential source of infectious materials. The packaging material used shall be in accordance with the FSS (Packaging) regulation, 2018 (India).
