3. **Scope of Work:**

Participants can opt for any number of concepts out of the three listed below:

- a. **Use of Biometrics:** Government of India has launched National Digital Livestock Mission (NDLM) to uniquely identify every livestock. As of now, cattle identification in India is done mostly through ear tags, however a need has been felt for a biometric method for animal identification which will make the Unique ID a fool proof mechanism for all purposes. Therefore, this exercise aims at establishment of using biometric Identification through digital means as a unique, tamper-proof methods for animal identification.
- b. **Internet of Things (IOT) devices:** Use IOT devices in Livestock sector to help the farmers to measure various relevant vitals of the animals, such as their movement, body temperature, humidity, heat detection, other medical parameters, intake of food etc. This can be achieved by using IoT devices for Real time tracking of activity, Rumination, and other cattle vitals. The data so collected can be helpful in some of the activities listed below using AI/ML algorithms:
 - ◆ Real time monitoring of parameters / activities like walking, breathing, temperature, eating, rumination, etc. for early detection of sickness.
 - ◆ Identification of abnormal behavior for timely medical help.
 - ◆ Monitoring of before and after parameters for treatment/ medication response
 - ◆ Heat window alerts for Artificial Insemination.
 - ◆ Pregnancy confirmation.
 - ◆ Calving alerts
 - ◆ Stress alerts
 - ◆ Generating real time alerts to doctors and farmers.
- c. **Traceability Solutions for Dairy and Livestock Products using Blockchain or any other Technology:** It is proposed to work to end to end Traceability solutions for Dairy and Livestock products, following are the expectations:
 - ◆ End to end traceability capture.
 - ◆ Include GI Tags wherever required.
 - ◆ Complete journey of the product be available in form of a QR code on packaging.
 - ◆ Any other form of technology or solutions for marketing the product.
- d. **Use of Drones:** It is proposed to establish use of Drone technology in Livestock and Dairying sector for monitoring and productivity activities. Drone technology is to be made more accessible and controllable for this sector. Some of the uses are listed hereunder but not limited to this list only as it is only for indicative purposes:
 - a. Animal Tracking and counting
 - b. Management of Animal health conditions
 - c. Farm security, etc.

4.0 **Aims & Objectives:**

- To ensure usage of biometric technology in Animal Identification as a foolproof mechanism.
- To ensure usage of IOT devices in offering a digital platform for the farmers in improving animal health and enhancing milk productivity.
- To ensure early diagnosis of diseases and epidemics in animals and implement solutions to overcome them at the beginning.
- To ensure proper alerts are raised at the right time for heat period, health issues etc.
- To establish end to end Traceability solutions for Livestock products.

- To use drone technology for monitoring and productivity activities.

5.0 EOI Processing Fees

A non-refundable processing fee for Rs. 5,000/- (Five Thousand Rupees only) per concept in the form of a Demand draft or a Pay Order drawn in favor of "PAO Department of Animal Husbandry & Dairying" Payable at Delhi must be submitted along with the EOI response. Bids received without or with inadequate EOI processing fees shall be liable to get rejected.
